

# MA901

## General Description

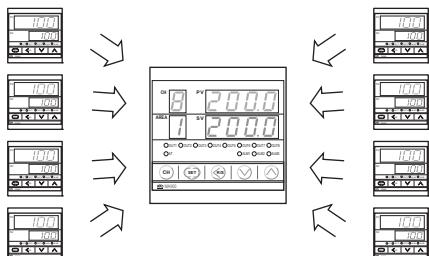

The MA901 controls up to 8 channels in a compact 1/4 DIN size. The MA901 increases zone density and makes smaller numbers of loops affordable, yet still holds many of the advantages that a single loop controller might offer. This unit will aid designers of control equipment by saving labor costs, installation costs, electric panel sizes, and operation costs.

## Features

- ☆ 8 channels control
- ☆ Multi-memory area
- ☆ Digital communications
- ☆ Digital contact input
- ☆ Multiple alarm functions
- ☆ Close horizontal mounting
- ☆ IP65 Waterproof/Dustproof protection

### 8 channels Control

8 channels of temperature controls are packed into 96 x 96 x 100mm case. The MA901 can reduce your panel cutouts and make your panel board smaller.

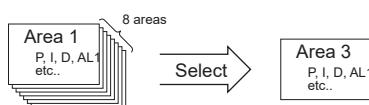

### Multi-Memory Area

Up to 8 kinds of combinations of temperature set value, PID constant, alarm set value, etc. for each channel can be registered as "memory area" (recipe).

The change of settings caused by the change of a process and product can be simply realized only by switching the "area". The switching of the area by optional external contact input is also available.

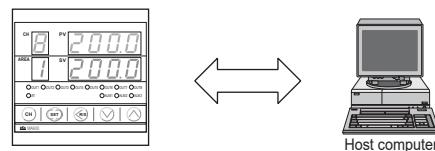

The available parameters for multi memory area :

SV, Alarm set values, PID constants, Anti-reset windup, Overlap/dead band, Setting change rate limiter, Channel used/unused

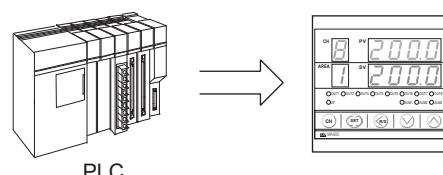

### Digital Communications (Optional)

An optional communications interface, RS-232C or RS-422A, RS-485 is available for networking to computers, PLCs and SCADA software. MODBUS or ANSI (RKC standard) protocol can be selected. Up to 31 units can be interfaced on one RS-422A or RS-485 communication line.

### Digital Contact Input (Optional)

An optional digital contact input is available for RUN/STOP and memory area switching. (RUN/STOP switching can also be completed at the front key panel.)

### Multiple Alarm Functions

The MA901 provides a wide selection of alarm types to configure up to three alarms.

Alarm 1 (Standard) :

Temperature alarms, Loop break alarm, FAIL

Alarm 2 (Optional) :

Temperature alarms, Heater break alarm, FAIL

Alarm 3 (Optional) :

Temperature alarms, FAIL

• Alarm output is common to all channels.

# Multi-Loop Digital Temperature Controller MA901

## Specifications

### Input

#### Number of Inputs

8 points

#### Input

- a) Thermocouple : K, J, R, S, B, E, T, N (JIS/IEC), PLII (NBS)  
W5Re/W26Re (ASTM), U, L (DIN)
  - Influence of external resistance : Approx. 0.2 $\mu$ V/ $\Omega$
  - Input break action : Up-scale
- b) RTD : Pt100 (JIS/IEC), JPt100 (JIS)
  - Influence of input lead resistance : Approx. 0.01[%/ $\Omega$ ] of reading
  - Maximum 10 $\Omega$  per wire
  - Input break action : Up-scale
  - Input is not isolated.
- c) DC voltage : 0 to 5V, 1 to 5V, 0 to 10V
  - Input break action : Down-scale
  - Input is not isolated.

#### Sampling Time

1 sec

#### Input Filter

First order lag digital filter  
Time constant 1 to 100 sec. (OFF when 0 is set)

#### PV Bias

- span to +span (Within -1999 to 9999)

### Performance

#### Measuring Accuracy

- a) Thermocouple
  - $\pm(0.3\% \text{ of reading} + 1 \text{ digit})$  or  $\pm 2^\circ\text{C}$  ( $4^\circ\text{F}$ ) whichever is larger
  - Accuracy is not guaranteed between 0 and 399 $^\circ\text{C}$  (0 and 799 $^\circ\text{F}$ ) for type R, S and B.
  - Accuracy is not guaranteed less than -100.0 $^\circ\text{C}$  (-158.0 $^\circ\text{F}$ ) for type K, J, T and U.
- b) RTD
  - $\pm(0.3\% \text{ of reading} + 1 \text{ digit})$  or  $\pm 0.8^\circ\text{C}$  ( $1.6^\circ\text{F}$ ) whichever is larger
- c) DC voltage
  - $\pm(0.3\% \text{ of span} + 1 \text{ digit})$

#### Insulation Resistance

More than 20M $\Omega$  (500V DC) between measured terminals and ground  
More than 20M $\Omega$  (500V DC) between power terminals and ground

#### Dielectric Strength

1000V AC for one minute between measured terminals and ground  
1500V AC for one minute between power terminals and ground

### Control

#### Control Method

PID control (with autotuning function)  
• Available for reverse and direct action. (Specify when ordering.)

#### Major Setting Range

- Set value : Same as input range.  
Proportional band : 1 to span (ON/OFF action when P=0)
  - Differential gap at ON/OFF action is 2 $^\circ\text{C}$  ( $4^\circ\text{F}$ ) or 0.2%.

Integral time : 1 to 3600sec.(P + D action when I=0)  
Derivative time : 1 to 3600sec.(P + I action when D=0)  
Anti-Reset Windup(ARW) : 1 to 100% of heat side proportional band  
(Integral action is OFF when ARW=0)  
Proportional cycle time : 1 to 100 sec.

#### Operation Mode

Available for switching each channel to be normal (control), alarm monitoring (control output OFF, alarm action enabled) and unused.

#### Control Output

- Relay output : Form A contact, 250V AC 3A (resistive load)  
Voltage pulse output : 0/12V DC  
(Load resistance : More than 600 $\Omega$ )  
Current output : 4 to 20mA DC or 0 to 20mA DC  
(Load resistance : Less than 600 $\Omega$ )  
Open collector output : Load voltage : Less than 30V DC,  
(Sink type) Maximum load current : Less than 100mA  
Minimum load current : 0.5mA

• Between output terminals are not isolated.

### Alarm (Up to 3 points)

(Optional)

- Alarm 1 output (Standard), Alarm 2, 3 (Optional)

#### Temperature Alarm

- a) Type : Deviation High, Low, High/Low, Band, Process High, Low  
Set value High, Low, Fail
- b) Differential gap : 2 $^\circ\text{C}$  ( $^\circ\text{F}$ ) or 2.0 $^\circ\text{C}$  ( $^\circ\text{F}$ ) (Temperature input)  
0.2% (Voltage, current input)

#### Control Loop Break Alarm (LBA)

- a) LBA time setting : 0.1 to 200.0 min.
- b) LBA deadband : 0 to 9999 °C [ $^\circ\text{F}$ ] or 100% of span  
(OFF by setting zero)

• Output from Alarm 1 terminal.

#### Heater Break Alarm (For single phase)

- a) CT type : CTL-6-P-N (30A), CTL-12-S56-10L-N (100A)
- b) Display range : 0.0 to 100.0A
- c) Accuracy :  $\pm 5\%$  of input value or  $\pm 2\text{A}$  (whichever is larger)

• Output from Alarm 2 terminal.

#### Alarm Output

- a) Alarm Output 1 to 3  
Relay output, Form A contact 250V AC 1A (resistive load)

### Contact Input

(Optional)

#### Number of Inputs

5 points

#### Contact Input Type

- a) RUN/STOP switching (OPEN : STOP, CLOSE : RUN)
- b) Memory area selection :
  - Area selection : 3 points (BCD input 0 to 7)
  - Data set : 1 point

#### Input Rating

Non-voltage contact input (OPEN : 500k $\Omega$  or more, CLOSE : 10 $\Omega$  or less)

### Communications

(Optional)

- a) Communication method : RS-232C (3-wire), RS-422A (4-wire)  
RS-485 (2-wire)
- b) Communication speed : 2400, 4800, 9600, 19200 BPS
- c) Bit format
  - Start bit : 1
  - Data bit : 7 or 8 •For MODBUS 8 bit only
  - Parity bit : Even, odd or without parity
  - Stop bit : 1 or 2
- d) Communication code : ASCII(JIS) 7-bit code
- e) Maximum connection : RS-232C : 1 unit  
RS-422A, RS-485 : 31 units  
(Address can be set from 0 to 99.)

### Waterproof/Dustproof

(Optional)

IP65

• Waterproof/dustproof protection only effective from the front in panel mounted installations.

## General Specifications

---

### **Supply Voltage**

- a) 90 to 264V AC (Including supply voltage variation)  
[Rating : 100 to 240V AC] (50/60Hz common)
- b) 21.6 to 26.4V AC (Including supply voltage variation)  
[Rating : 24V AC] (50/60Hz common)
- c) 21.6 to 26.4V DC (Ripple rate 10% p-p or less) [Rating : 24V DC]

### **Power Consumption**

- Less than 14VA for standard AC type at 100V
- Less than 20VA for standard AC type at 240V
- Less than 11VA for 24V AC type
- Less than 330mA for 24V DC type

### **Power Failure Effect**

Not affected by power failure shorter than 30msec, otherwise reset to the initial state.

### **Operating Environments**

0 to 50°C [32 to 122°F], 45 to 85% RH

### **Memory Backup**

Backed up by non-volatile memory.  
Number of writing : Approx. 100,000 times  
Data retaining period : Approx. 10 years

### **Net Weight**

Approx. 560g

### **External Dimensions (W x H x D)**

96 x 96 x 100mm

## Compliance with Standards

---

- CE Mark
- UL/cUL Recognized
- C-Tick Mark

## External Dimensions and Rear Terminals

Unit : mm

For mounting of the controllers, panel thickness must be between 1 to 10mm. When mounting multiple controllers close together, the panel strength should be checked to ensure proper support.

• Dustproof and waterproof are not effective when controllers are closely mounted.

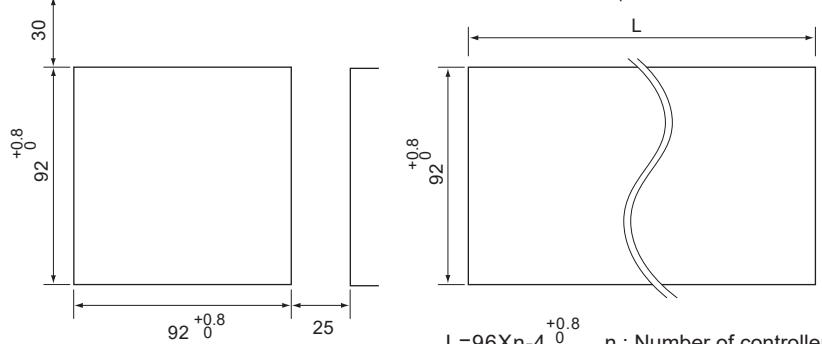

• Use the solder less terminal appropriate to the screw size.

Screw size : M3 X 6

Panel Cutouts

(Close horizontal mounting)  
• Up to 6 unit

$L = 96Xn-4$       n : Number of controllers  
( $2 \leq n \leq 6$ )
