

# Fluke 700G/TRACK Logging Software

## Key features

### Software for the 700G Pressure Test Gauges

**Manage your instruments and calibration data with this easy-to-use software. For use with 700G Series gauges to perform real-time pressure gauge data logging.**

- Enables data download and logging configurations to the 700G Series gauges for a remote logging event
- Configure logging event reading rate, duration, and measurement units
- Upload measurements logged remotely, and display or export measurements
- Includes communication cable for connection to a PC and CD-Rom user manual
- Manage your instruments and calibration data with this easy-to-use software. For use with 700G Series gauges to perform real-time data logging.

## Product overview: Fluke 700G/TRACK Logging Software

700GTrack software enables the [Fluke 700G](#) to perform pressure gauge data logging. This easy-to-use software:

- Manages your 700G gauge
- Uploads measurements logged remotely for display or export for reports
- Enables troubleshooting of irregularities in a pressurized system

### How Does 700GTRACK Data Logging Software Work?

First, connect the 700G gauge to a computer using the cable that ships with the software. Next, use the software to

configure the 700G gauge to perform data logging. Finally, connect the 700G to the pressure system under review. The gauge will sample pressure at the intervals you specified during configuration. Once the data is logged, you can then use templates to generate graphs for troubleshooting pressure irregularities such as leaks or spikes.

700GTRACK is a one-time purchase that allows installation on unlimited computers for use with unlimited numbers of 700G gauges, unlike some competing data logging software that charge ongoing fees.

## Ordering information
