

AGL PROBE
security + quality

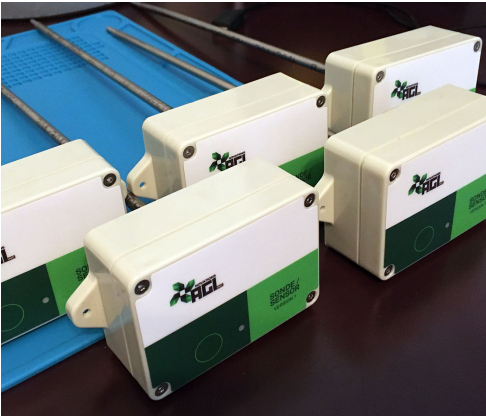

SAFE STORAGE

SONDE AGL

QU'EST-CE QUE C'EST?

Un système complet de suivi de la température dans les entrepôts de foin.

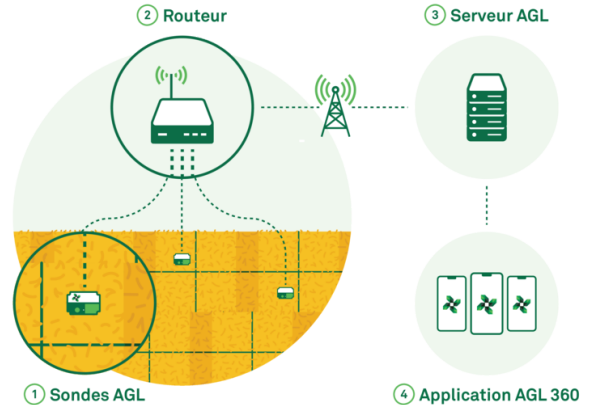

**The AGL Probe
allows you to
monitor the
temperature of your
goods in real time.**

**Store your products
safely and keep
control of its quality.**

FUNCTIONING

1. Install your AGL Probes.
Distribute them to different locations in the warehouse.
2. Router includes an LTE data plan (depending on the subscription chosen) which allows a wireless internet connection.
3. The data captured by the probes is sent to the AGL server via cell towers.
You can check the temperature and humidity in
4. real time and receive alerts directly from your mobile device using the AGL 360 app.

The use of AGL Probes allows active storage management.

THE ADVANTAGES OF THE AGL PROBE

+ SECURITY

Prevent fires and spontaneous combustion with real-time monitoring and overtemperature alerts.

+ CONNECTIVITY

Monitor your hay warehouses, wherever you are, via your AGL 360 app.

+ QUALITY
